LA POSTA is the research journal of the Mountain & Desert West Postal History Research Society. It is published on an irregular basis with six issues per volume. The subscription rate is \$5 per volume, and single copies are available at \$1.50 each. For additional information, or to place a subscription, write: RICHARD W. HELBOCK, EDITOR, 1635 Mariposa Drive, Las Cruces, New Mexico 88001.

POSTMARK TYPES OF ALASKA TERRITORY: AN EMPIRICAL CLASSIFICATION,
PART III (cont.), FOUR BARS AND VARIATIONS

By Richard W. Helbock

D. The Wide-spaced 4-bars of 1911.

Nearly all of the 76 Alaskan post offices which were established between 1910 and 1919 were initially issued a four-bar postmark device which differed markedly from those used during the 1903-1909 period. The most noticeable feature of this new postmark type was the fact that its killer bars were spaced much farther apart than any previous type. Measuring from the top of the uppermost bar to the bottom of the lowest bar, the 1911 4-bar killer averaged 19-20mm. compared to 13-14mm. for the 1907 and 1909 types. In addition to wide-spaced bars this new type was characterized by squared letters with prominent punctuation after the office name, and the spacing of the word, "ALASKA" such that it covered 95° plus or minus 5° of arc at the bottom of the dial. Figure 12 illustrates two representative examples of this 1911 type postmark. Note that the Metlakatla example has no period after "ALASKA." It would be possible to subdivide this type into two classes: those that had punctuation following "ALASKA", and those that did not. But since all other features appear to be the same for both classes, and punctuation tended to wear down or become indistinguishable in some strikes, it was decided to represent both classes as a single type.

(Enlarged about 35%)

Figure 12. The wide-spaced 4-bar of 1911.

Distribution of this device was wide-spread. Thus far a total of 61 different offices are known to have used a wide-spaced four bar of 1911. Since data is rather incomplete from this early period of Alaska's postal history, the number may be

expected to increase as more discoveries are reported. The 61 offices known to have used this postmark type are listed in Table 11 along with the known range of use for each office. It is interesting to note that Anchorage was among the offices using this type of postmark. The earliest examples of Anchorage postmarks are of this type, although the device was replaced at a fairly early date (at least as early as November 1915) by a more durable steel hand cancel.

Notes: Town/Type/No. refers to type numbers assigned in Helbock, Postmarks of Territorial Alaska.

* Earliest known use of this postmark type.

** Latest known use of this postmark type.

Source: Helbock, Postmarks of Territorial Alaska, 1976.

The earliest known use of a wide-spaced 4-bar postmark type occurred in Iditarod in November 1910. Iditarod post office was established April 23, 1910. At least that is the date given for

the appointment of the first Iditarod postmaster. It seems likely that the first postmark came into use at Iditarod during the late summer or early fall of 1910.

Some of these wide-spaced types of 1911 saw very long use. The Taku Harbor post office, established in 1912, was still using the same postmark in 1943. The office was discontinued in 1945, and it may still have been using a 1911-type device when it shut its doors. No other postmark types have been recorded from Taku Harbor. The Miller House post office used a 1911-type device on December 21, 1943. This is the latest documented use of a device of this type. Useage during the 1920's was common, and many post offices continued use into the 1930's.

Of the offices listed above the only variant from the general description of type characteristics occurred at Mile Seven. The Mile Seven postmark differs from normal for the type in that "ALASKA" covers only 75° of arc. Since the office was not established until 1917, the device it received came very late in the period for 1911-type postmarks. This may account for its variance.

E. The S.E. and S.W. 4-bars of 1920.

What is perhaps the most interesting of all 4-bar types used in Alaska was introduced to a few post offices beginning in 1920. This postmark type brought a radical change in design to the 4-bar style, and, while the type itself was short-lived and apparently experimental, some of its features were to be carried-on to other 4-bar types which followed.

It would be particularly useful to have Post Office Department documentation in discussing the genesis of this particular postmark type. Unfortunately, to the best of my knowledge, such documentation regarding the design of postmarks does not exist so we must proceed again building our castle on a floor of assumptions. First off, we all know that Alaska is a very big place. We also know that there have never been county divisions in Alaska as we find in the other United States. Post office assignments, census organization, and other sub-state(territorial) organization has tended to be based upon judicial districts. At the same time there has been at least informal attempts to refer to regions of Alaska. The "Southeast" is a particularly popular regionalization.

Beginning in 1919 the Post Office Department began listing information regarding status changes for Alaska post offices in the Postal Bulletin according to a regional abbreviation. The first such listing reads,

"Sumdum, S. E. Name and site changed to Point Astley, 9 miles N. E. eff. 9-23-1919 Henry J. Ahrenstedt re-app."

This entry is dated 25 September 1919, and during the next two years most Postal Bulletin references to Alaskan post offices carry a regional abbreviation. The abbreviations are: S.E. for southeast; S.W. for southwest; C. for central; N. for north; S. for south; and N.W. for northwest. Others are possible, but those are the only ones listed.

During the two year period in which regional abbreviations are used a total of 12 post offices were established and re-established in Alaska. These offices are listed below in Table 12 along with their appropriate dates and the regional abbreviations from the Postal Bulletin.

TABLE 12

POST OFFICES ESTABLISHED AND RE-ESTABLISHED,
9/25/1919 - 8/23/1921

Post Office, Regn'l. Abbr.	Established	First Postmaster

False Pass, S.W.	25 May 1921	William L. Brown
Beaver, 4th Dist.	26 Jan 1921	Charles W. Schultz
Kwiguk, N.W.	25 Sep 1921	Nettie S. Jacobsgaard

* Presumably S.E., although no specific abbreviation is indicated for Point Astley.

Source: Postal Bulletin, 25 September 1919 through 23 August 1921.

Now for the postmarks. From five of the 12 post offices listed in Table 12, the first postmark type recorded in use after the date of establishment or re-establishment incorporates the initials "S.E. or S.W." These postmarks constitute the type, and a most unusual type it is (Figure 13).

(Enlarged about 35%)
Figure 13. The S.E. 4-bar of 1920.

The dominant feature of the type is of course the use of a regional abbreviation following the office name, but there are some other features which were new to 4-bars. The first use of Roman, or serified, letters in a 4-bar occurred with this type. The spacing of "ALASKA" to cover exactly 90° of arc similarly made its debut with this postmark type. Killer bar spacing was wide (about 20mm. top to bottom) as in the case of the 1911-type. These features are constant for five of the six known "S.E./S.W." type examples, but there is a sixth example which cuts against the grain. The first False Pass postmark matched the general type description to a tee. Letters were Roman, "ALASKA" covered 90° of arc, and killer bars were wide-spaced. There is only one example known to date, and it is dated 18 June 1923. Presumably others will turn-up with 1921, 1922, 1923, and perhaps 1924 dates. But in 1923 or 1924 False Pass acquired a new device. It still read, "FALSE PASS, S.W." but it differed in other ways. Letters were block and reminiscent of the squared 1911-type. "ALASKA" covered 100° of arc, again similar to the 1911-type. Finally, the killer bars were close set, measuring only 14mm. from top to bottom. Again only a single example is known, and it is dated 23 May 1924. Table 13 lists the known "S.E./S.W." type postmarks.

Source: Helbock, Postmarks of Territorial Alaska, 1976.

Based upon the little bit of evidence available from the above listed postmarks and the information available from the Postal Bulletins, it now seems possible to clear-up most of the mystery surrounding the elusive "S.E./S.W." postmarks of Alaska. First, postmarks of this type were transitional or experimental. They incorporated some new features which were to be used in later types such as Roman letters and a 90° "ALASKA." Second, their distribution was very limited. No more than 12 offices received postmarks of this type, and the actual number is probably smaller. Looking again at Table 12 we can pare the list down somewhat.

Point Astley is a possible. No postmarks are yet known from that office, although the Postal Bulletin did not specifically mention "S.E." in the notice. Sumdum is another possible. When it was re-established in 1920 the original office had been out of service for about 6 months. A new postmaster was appointed so he may well have received a new postmark device. It is also possible however that the old postmaster simply passed on the old Sumdum postmark to the new postmaster. Given the fact that the earliest Sumdum postmark known after this re-establishment is a wide-spaced 4-bar of 1911 with a date of 12 November 1924, my guess is that Sumdum was never issued a "S.E." type.

Saint Timothys and Portlock are possibles, but seem unlikely given their single letter initials. Saint Timothys was closed in 1927 before a later re-establishment, and no postmarks are known from the 1920-1927 period of operation. The first Portlock postmark recorded is dated 8 July 1937, but it is of a type introduced during the early 1920's so it could well have been Portlock's first postmark.

Klukwan seems a definite probable. The office operated only until 1923, but was later re-established in 1939. There are no examples known from this 1920-1923 period, but if and when they turn-up it seems likely they will read, "KLUKWAN, S.E. ALASKA." It does not appear likely that Beaver ever used an initial bearing postmark. First of all, the office appeared in the Postal Bulletin with a 4th District designation. Second, a Beaver postmark of 29 May 1923 is known, and it is not of this type.

Kwiguk would appear to be the other probable. The office was discontinued in 1924 and later re-established in 1932. Once again no postmarks are known from this 1921-1924 period, but it would seem reasonable to believe they read, "KWIGUK, N.W. ALASKA."

Looking once again at the probable distribution of this postmark type, there are five offices known to have used such a device, two more where use is suspected but not confirmed, and five others where use is possible but not likely. The mystery of what and how widely used would appear to be abated if not solved, but a large question mark still surrounds the reason for such a type to be used in the first place.

(TO BE CONTINUED)

ARIZONA - NEW MEXICO TERRITORIAL POSTMASTERS

By Thomas K. Todsén

It has been interesting to look through lists of New Mexico territorial postmasters to find those who had served at the most locations and then try to track-down information on them (e.g., Benno Rosenfeld, La Posta, Vol.5, No.2). In order to seek further indications of the wanderings on the Southwestern frontier, the Arizona and New Mexico postmaster listings were cross-checked. This is a report of the results.

There are three ways by which it could appear that the postmaster had changed locations. First, he could have stayed in one place, but the state designation changed. This was the case with Mark Aldrich, appointed postmaster of Tucson, New Mexico, and of Tucson, Arizona - the only instance incidentally. Then there was the case where the post office moved, and the postmaster just went along with it. Once again, we have a single example with Charles H. Dane accompanying the Terminus, Arizona, post office railcar from Casa Grande, Arizona, to Deming, New Mexico, with the building of the Southern Pacific. The railcar eventually became Deming's first post office and the name was changed from Terminus to Deming. Finally, there were many cases where the postmaster moved back and forth across territorial boundaries to become postmaster at different post offices.

Appearance of the same name in both lists is no guarantee that the individuals are the same. For example, Thomas Hughes could hardly have been postmaster of Albuquerque from July 1882 to August 1885, and simultaneously of Casa Blanco-Crittenden, Arizona, from June 1873 to September 1884. Likewise, James H. Knight would have had a problem being at Nutt, NM, and at Oatman, Ariz., at the same time. However, one wonders about H. T. Trick, shown as postmaster at Houck, Arizona, from 1909 to June 1910, and at Manuelito, New Mexico, from December 1909 into statehood. The two towns were only about 17 miles apart on the A.T. & S.F., so maybe he really was both!

Some of the moving was rather obviously related to the railroads. The postmaster probably having been the station agent at small shipping or section points. Such would seem to be the case with Walter E. Weaver, who moved from Aztec, Arizona, to Lanark, New Mexico, both on the Southern Pacific. Also apparently connected with the Southern Pacific were Frank E. Callisch (Separ, NM, to Dragoon, AZ); Benjamin M. Lee (Wellton, AZ, to Lanark, NM); Jesse C. McConnell (Sentinel, AZ, to Cambray, NM); Lewis H. Pritchett (Sentinel, AZ, to Adem, NM); and Frank A. Stone (Strauss, NM, to Arizola, AZ). Similarly, with the Atchison, Topeka, and Santa Fe might have been Charles L. Flynn (Cranes, NM, to Winslow, AZ); Henry Reed (Fort Wrangle, NM, to Holbrook, AZ); George C. West (Cranes, NM, to Junction, AZ); and James H. Wilson (Manuelito, NM, to Holbrook, AZ).

There were a couple of individuals who must have been in the general mercantile business or owned ranches near the territorial border. Max A. Bahlke of Whittum, AZ, survived the name change to Blue, moved a few miles downstream to Benton, AZ, (until it was discontinued), and then went just across the line to Alma, NM. In the same area at about the same time, Charles B. Martin was at Luna, NM, then moved to Blue, AZ, and then went back to Luna again.

A possible quadruple office-holder was John F. Holder, who was initially postmaster at Ruidoso, NM, then at Angora, AZ, where he served as the first postmaster, next he was at Gisela, AZ, and finally at Sheldon, AZ. But to me one of the most interesting of our peripatetic postmasters was Thomas F. White. White was postmaster at Frontera, New Mexico (17 April 1851 - 12 March 1852), but the office was actually in Texas just above El Paso. Later White became postmaster at Fort Buchanan, New Mexico (24 March 1859 - 21 October 1860), an office which was shortly to be re-designated Fort Buchanan, Arizona. Ah, the shifting sands of time!

NINETEENTH CENTURY POST OFFICES OF GILLIAM COUNTY, OREGON

By Richard W. Helbock

Gilliam County is located in northcentral Oregon and covers an area of 1211 square miles. The county is sparsely populated and there are no major towns. Gilliam County was created by the Oregon State Legislature February 25, 1885. The county's name honors Colonel Cornelius Gilliam who commanded troops of the Oregon provisional government in an 1847-48 campaign against the Cayuse Indians after the Whitman Massacre.

The postal history of Gilliam County began long before the county was erected. Scotts, the first post office in the area, was established in 1867, and 16 of the county's 25 19th century post offices saw service before 1885. This article presents a brief historical sketch of each of Gilliam County's 25 pioneer post offices. The offices are presented in chronological order according to the appointment date of their first postmaster.

SCOTTS. Established February 4, 1867. Scotts post office, named for a local pioneer settler, was located on the John Day River's east bank a few miles north of the mouth of Rock Creek. The office was operated in conjunction with Leonard's Bridge, a toll way over the John Day, and Daniel Leonard served as the first postmaster. The office was in section 11, township 1 north, range 19 east.

19th Century Postmaster Appointments: Daniel G. Leonard, Feb. 4, 1867; Edward L. Grimes, Feb. 13, 1870; Daniel G. Leonard, Dec. 27, 1870.

Status: The site of this office was moved and its name was changed to Rockville on November 26, 1878.

ROCK CREEK. Established June 3, 1872. The Rock Creek post office was a short-lived facility which was named for the stream which traverses Gilliam County from southeast to northwest. This office was undoubtedly located on or near the stream, but its exact location is not known.

19th Century Postmaster Appointments: Alexander Smith, June 3, 1872; James R. Alfrey, July 1, 1873.

Status: The Rock Creek post office was discontinued March 11, 1874. There is no available evidence that suggests this office was in the same locality as the Rockcreek post office established in 1906.

OLEX. Established October 27, 1874. The post office name was intended to have honored Alex Smith, a pioneer local resident (and possibly the same Alex Smith who was the first Rock Creek postmaster) but authorities in Washington misinterpreted the name as Olex, and so it remained. The Olex post office was located on Rock Creek at the mouth of Juniper Canyon in section 10, township 1 south, range 21 east.

19th Century Postmaster Appointments: James H. Butler, Oct. 27, 1874; Charles A. Schutz, Dec. 30, 1879; Ella C. Shutz, Aug. 12, 1880; Henry D. Randall, July 3, 1882; Jerome W. Thomas, Jan. 3, 1887; Henry D. Randall, Dec. 29, 1891; Lonner O. Ralston, Aug. 2, 1893; William L. Tobey, Jan. 5, 1899.

Status: The Olex post office was converted to a rural station of the Arlington post office on October 31, 1959. It still functions as such.

LONE ROCK. Established November 8, 1875. The Lone Rock post office was named for a large rock which stands about 100 feet high and measures some 60 feet in diameter. This rock is located not far from the central part of the community. The post office was located in the southeastern corner of Gilliam County on Lone Rock Creek in section 36, township 5 south, range 23 east.

19th Century Postmaster Appointments: Robert G. Robinson, Nov. 8, 1875; Jay P. Lucas, Sept. 6, 1883; Edward C. Nerren, Dec. 4, 1884; Robert G. Robinson, Jan. 30, 1885; Abraham Wing, Oct. 25, 1886; Albert Henshaw, April 26, 1887; Abraham Wing, Oct. 30, 1889; Juhn B. Goff, Dec. 31, 1890; Edward Cofner, May 15, 1893; Martha Hogan, Oct. 4, 1894; Perry L. Ham, Sept. 28, 1898.

Status: The spelling of Lone Rock was changed to LONEROCK on October 4, 1894. The Lonerock post office was discontinued July 5, 1963

ROCKVILLE. Established November 26, 1878, by change of name from Scotts. After 4 years of relatively light postal business, the Scotts post office was moved some 3 miles east up Rock Creek, and its name was changed to Rockville. The Rockville post office was located in section 7, township 1 north, range 20 east.

19th Century Postmaster Appointments: Thomas S. Lang, Nov. 26, 1878; Albert N. Varney, Jan. 8, 1883.

Status: The Rockville post office was discontinued August 2, 1889, with papers to Blalock.

WILLOWS. Established December 17, 1878. The Willows post office was named descriptively, for willow trees are a common feature of many central Oregon stream valleys. This office was located at or near the mouth of Willow Creek in the northeast corner of the county.

19th Century Postmaster Appointments: Joseph W. Smith, Dec. 17, 1878; Daniel P. Phippey, March 13, 1882; James A. Vawter, Jan. 26, 1895; Charles T. White, April 13, 1898.

Status: The Willows post office was not in service for about 10 years from June 29, 1885 to Jan. 29, 1895, and again from July 12, 1895 to April 13, 1898. The office was finally discontinued on October 15, 1942.

BLALOCK. Established January 11, 1881. This post office was named in honor of Dr. Nelson G. Blalock, a pioneer Walla Walla resident who was active in horticulture work along the Columbia River. The

Blalock post office was on the south bank of the Columbia River at the mouth of Blalock Canyon in section 31, township 3 north, range 20 east.

19th Century Postmaster Appointments: Burrell W. Griffin, Jan. 11, 1881; James E. Sindel, Sept. 10, 1884; Walter H. Mariner, Oct. 12, 1887; William J. Mariner, April 13, 1889.

Status: The Blalock post office was discontinued Dec. 31, 1959.

FLETTVILLE. Established November 4, 1881. The Flettville post office was named for George W. Flett, a pioneer settler on Rock Creek in the eastern part of Gilliam County. This office was situated along Rock Creek a few miles northeast of the community of Gwendolen, and in the central part of township 2 south, range 22 east.

19th Century Postmaster Appointments: George W. Flett, Nov. 4, 1881.

Status: The Flettville post office was discontinued on February 25, 1884, mail to Olex.

ALKALI. Established November 7, 1881. The Alkali post office was named for the canyon at whose mouth it was located. This name is quite common in arid regions of the West, and was doubtlessly applied in this case because the canyon does not support a permanent stream. Water found in this canyon would likely be heavy with dissolved alkaline salts. Alkali post office was located on the south bank of the Columbia River in section 21, township 3 north, range 21 east.

19th Century Postmaster Appointments: Elijah W. Rhea, Nov. 7, 1881; Edwin B. Comfort, April 22, 1883; Thomas L. Bradbury, July 23, 1885.

Status: On December 31, 1885, the name of this post office was changed to Arlington.

FLETTS. Established May 5, 1884. This post office was the second in the county to be named for George W. Flett, and it was located in the same general vicinity as the Flettville office. The actual location changed with the availability of postmasters, but it was usually in the vicinity of section 15, township 2 south, range 22 east.

19th Century Postmaster Appointments: Orlando O. Rowland, May 5, 1884; David F. Stricklin, Sept. 28, 1885; Henry M. Pitman, Dec. 31, 1885; David F. Stricklin, Nov. 9, 1886.

Status: The Fletts post office was discontinued September 12, 1888, papers to Legality.

OASIS. Established May 5, 1884. The Oasis post office bore a descriptive name. This office was located in Eightmile Canyon in the northeastern portion of Gilliam County. A large spring in the canyon provided enough water to support a small farm of irrigated alfalfa, but the farm was literally an oasis in the surrounding arid land.

19th Century Postmaster Appointments: Thomas Fairhurst, May 5, 1884.

Status: The Oasis post office was discontinued November 3, 1886, with mail to Arlington.

CONDON. Established July 10, 1884. Condon was named for Harvey C. Condon, of the Arlington firm of Condon and Cornish which sold lots in the townsite. Condon eventually outstripped Arlington in terms of population and economic growth and became the county seat which it remains to this day. The Condon post office is located in section 10, township 4 south, range 21 east.

19th Century Postmaster Appointments: David B. Trimble, July 10, 1884; Linus W. Darling, Sept. 11, 1889; Herbert Halstead, July 3, 1890; Linus W. Darling, April 22, 1893; John Lyons, April 6, 1897; John F. Reisacher, Nov. 18, 1897.

Status: The Condon post office is currently operating; ZIP Code - 97823.

MAYVILLE. Established October 3, 1884. It has been reported by Lewis A. McArthur that this office was named in conjunction with some incident which occurred as the office was established. The details of the incident are not given, but there is speculation that the name may reflect the month in which a petition for the post office was submitted. The Mayville post office was located in the extreme southern part of Gilliam County on the upper reaches of North Fork Butte Creek in section 4, township 6 south, range 21 east.

19th Century Postmaster Appointments: Samuel J. Thornton, Oct. 3, 1884; Louis C. Trask, Nov. 9, 1886; George C. Rippey, June 30, 1892; Ella N. Rinehart, Aug. 30, 1894; Ella N. Angell, April 20, 1899.

Status: The Mayville post office was converted to a rural station of the Fossil post office on May 31, 1958, and is currently operating as such.

CLEM. Established November 24, 1884. The Clem post office was named for Clemens A. Danneman, an early settler in Gilliam County who owned a ranch and provided accommodations for travelers. This office was located near the Condon spur of the Union Pacific in Scott Canyon, and in section 4, township 2 south, range 21 east.

19th Century Postmaster Appointments: Clemens A. Danneman, Nov. 24, 1884; James Larch, April 17, 1897.

Status: The Clem post office was not in service briefly from May 5, 1896, until April 17, 1897. The office was discontinued on March 31, 1937.

LEGALITY. Established November 24, 1884. The Legality post office was a short-lived facility located on or near Rock Creek a few miles south of Olex. The story behind the unusual name has unfortunately not survived the passage of time.

19th Century Postmaster Appointments: Henry J. Knott, Nov. 24, 1884; Calvin A. Vining, Sept. 17, 1885; Benjamin T. Snell, Nov. 1, 1886.

Status: The Legality post office was discontinued July 9, 1888, papers to Olex.

BAIRD. Established December 8, 1884. This post office was named for James C. Baird, its first and only postmaster. The Baird post office is reported to have been located at the point where travelers from the east along the Oregon Trail reached Alkali Canyon. This would place the office a few miles south of the present-day community of Arlington.

19th Century Postmaster Appointments: James C. Baird, Dec. 8, 1884.

Status: The Baird post office was discontinued February 8, 1886, papers to Arlington.

ARLINGTON. Established December 31, 1885, by change of name from Alkali. The citizens of Alkali, seeking a better image for their young town which had just become the county seat of newly erected Gilliam County, decided that Arlington, after the former home of General Robert E. Lee, had a more pleasing ring to it. A number of townsfolk had come from the southern United States, and this may have had some influence upon the choice. Arlington was located in the same place as Alkali for over 80 years, but construction of the John Day Dam during the 1960's forced the community to relocate on higher ground.

19th Century Postmaster Appointments: Thomas L. Bradbury, Dec. 31, 1885; Frank T. Hurlburt, April 17, 1886; James M. Keeney, May 16, 1888; Joseph H. Keeney, Nov. 28, 1888; John G. Ardrey, Oct. 16, 1889; William O. Zeigler, Sept. 11, 1890; Charles W. Shurte, April 20, 1894; James M. Johns, June 25, 1897; Elijah B. Frum, March 6, 1899.

Status: The Arlington post office is currently operating; ZIP Code - 97812.

IDEA. Established February 5, 1886. The reported intention of the man who petitioned for this office was to name it for the wife of a local settler. The settler's wife was named Ida, and somehow a mix-up occurred with the result of a post office named Idea. The Idea post office was located about 6 miles east of Condon in section 10, township 4 south, range 22 east near Sixmile Creek.

19th Century Postmaster Appointments: James W. Hyatt, Feb. 5, 1886; Royce James, May 4, 1889.

Status: The Idea post office was discontinued July 26, 1889, papers to Gooseberry.

MATNEY. Established December 4, 1886. The Matney post office was probably named for a prominent local settler, but details are not available. This office was located about 4 miles southeast of Condon near East Fork Thirtymile Creek.

19th Century Postmaster Appointments: Godfrey Schilling, Dec. 4, 1886.

Status: The Matney post office was discontinued April 20, 1892, papers to Condon.

VINTON. Established September 26, 1888. Information concerning either the location or the origin of the name of this short-lived post office has not been discovered. It is possible that the Vinton post office was located in territory which was later to become Wheeler County.

19th Century Postmaster Appointments: James S. Wheeler, Sept. 26, 1888.

Status: The Vinton post office was discontinued November 18, 1889.

SHELBY. Established October 22, 1888. The Shelby post office served approximately the same locality as was earlier served by the Flettville and Fletts post offices. This office, probably named for a local settler, was located on Rock Creek about seven miles south of Olex.

19th Century Postmaster Appointments: Malvina Anderson, Oct. 22, 1888; Lucius W. Paul, June 20, 1889; William B. Flett, June 13, 1890.

Status: The Shelby post office was discontinued May 24, 1893, with papers to Olex.

AJAX. Established December 26, 1888. This office is reported to have been named for the steamer Ajax, which brought a local settler to Oregon from California. The Ajax post office was located between Ferry and Devils canyons in section 20, township 2 south, range 19 east.

19th Century Postmaster Appointments: Mrs. Arabella Thrasher, Dec. 26, 1888; Mrs. Ellen Palmer, March 18, 1890.

Status: The Ajax post office was not in service between December 6, 1895 and January 30, 1910. This office was finally discontinued December 28, 1920, with papers to Condon.

CROY. Established April 17, 1890. The Croy post office was located in the northwestern part of Gilliam County on or near Rock Creek, and probably not far from the site of the old Scotts post office. The origin of the name is not known.

19th Century Postmaster Appointments: William Irvine, April 17, 1890; John J. Bash, Sept. 19, 1898.

Status: The Croy post office was discontinued January 30, 1911, papers to Rockcreek.

IGO. Established February 19, 1891. The Igo post office was named for John Igo, an early settler. This office was located in Ferry Canyon about 7 miles northwest of Condon in the southern part of township 3 south, range 20 east.

19th Century Postmaster Appointments: James G. Fix, Feb. 19, 1891.

Status: The Igo post office was discontinued December 17, 1892, papers to Condon.

GUMBO. A post office named Gumbo was authorized October 18, 1892, with Zachariah J. Martin to be the first postmaster, but the order was rescinded on November 15, 1892, before the office could begin actual operations.

EDITOR'S COMMENTS

First, an announcement! Ernie Peyton sends word that Nevada Postal History, the 1973 (first edition) by Robert P. Harris is currently available from Stanley W. Paher, Box 15444, Las Vegas, Nevada 89114. The price is \$8.50 postpaid. Mr. Paher has acquired the remaining stock of this most useful book, which lists Nevada post offices from 1861 to 1972.

While on the subject of postal history literature availability, I might mention that I have on hand about 8 copies of Mel Ricks' 1965 Directory of Alaska Postoffices and Postmasters. These are the last remaining copies of this widely cited guide to Alaskan post offices, and I will sell them on a first-come-first-served basis for \$4.50 postpaid. Also I will be happy to sell any and all a copy of my 136 page Postmarks of Alaska Territory for \$15 postpaid.

Enough commercials! As this is written in early August it is still too early to report the results of the reader preference survey. A few returns have come in, but too few thus far. Next issue a full report will appear.

This issue - our 40th - contains far too much Helbock! Don't get me wrong, I like to write, but I am too familiar with the talent of many of you like Whittlesey, and Rupert, and Meschter, and Harris, and Bauer, and many many others, to kid myself into thinking that I'm doing any kind of service by filling these pages with Helbock. Now, look friends, its autumn. The leaves are beginning to fall. The rainy season is about to start in the Pacific Northwest. Snow is not far off for you in the East and Northern Rockies. And those of us in the South and Southwest will soon enjoy the crisp fall weather. Why not make a little resolution to help out your ol' pal Bill with a little article for La Posta? I promise it will give you enormous satisfaction when into your mailbox comes an issue with a nice little postal history research piece under your very own name. Please give my humble request your serious consideration.

Now for some previews of things to come. Don Smith of Eugene is busy on a classification and listing of Oregon RFD cancels. If you can help him out, please do. Frank Norris of Tucson is beginning work on a study of Mojave Desert post offices, once again if you can help please write Frank at 4013 E. Bellevue, Tucson, AZ 85712. Tom Todsén is working on a short study of Estey City, New Mexico, an interesting ghost town that lies forgotten within the boundaries of White Sands Missile Range. I am thinking of taking on a Utah postal history project, and looking for people who would like to help. Utah represents one of the biggest unknowns in Western postal history. No post office listings, no postmark studies (aside from Chase and Cabeen), no county studies; not much of anything about Utah. I'm not a Utah collector myself, but it bothers me to see that big question mark hanging there amidst all the fine work on Colorado, and Arizona, and Nevada, and even a little on Idaho. How about it? Any volunteers for a Utah project?

RICHARD W. HELBOCK, EDITOR, 1635 MARIPOSA DR., LAS CRUCES, NM 88001
